

BRIDGEPOINT

LOCATION: KINGSTON ISLAND, CANBERRA
YEAR: 2011

BridgePoint, located on Canberra's Kingston Island, is a multi-residential development with 35 one to four bedroom apartments and 7 three bedroom lakeside residences with interiors by Mathieson. A display residence was completed in April 2011 showcasing a double height living space, kitchen, master bedroom and adjacent dressing room and ensuite. European oak is used extensively throughout, including timber flooring, a timber battened ceiling and a finely detailed timber screen to the mezzanine level study. The result is a calm, timeless interior with furniture selected to provide a comfortable, relaxed backdrop to the tranquil lakeside setting.
